NOTE: ESAs may not be brought to the residence hall until official approval has been given from the Office of University Housing. Please submit all necessary information with enough lead time to allow the office to fully consider your request.

REQUEST FOR INFORMATION Re: Emotional Support Animal

(The health care provider need not use this specific form, but all the information requested here is necessary for the institution to have in order to consider the request for an ESA; the form is provided as a convenience; however, we urge you to use this form.)

Student's Name:	 ULID:

The above-named student has indicated that you are the mental health professional who has suggested that having an Emotional Support Animal (ESA) in the residence hall will have therapeutic benefit in alleviating one or more of the identified symptoms or effects of the student's mental health disability. Generally, we prefer documentation from providers in the State of Louisiana or the student's home state who have personal knowledge of the student, consistent with their professional obligations.

NOTE: All Emotional Support Animals must be at least 1 year old and up to date on all their shots. All requests must be approved by a licensed Mental Health Professional.

Some websites sell certificates, registrations, and licensing documents for assistance animals to anyone who answers certain questions or participates in a short interview and pays a fee. Under the Fair Housing Act, a housing provider may request reliable documentation when an individual requesting a reasonable accommodation has a disability and disability-related need for an accommodation that are not obvious or otherwise known. In HUD's experience, such documentation from the internet is not, by itself, sufficient to reliably establish that an individual has a non-observable disability or disability-related need for an assistance animal. (Excerpt from 2020 HUD Guidance)

So that we may better evaluate the request for this accommodation, please answer the following questions:

Information About the Student's Disability

Federal law defines a person with a disability as someone who has a physical or mental impairment that
 <u>substantially limits</u> one or more major life activities. That suggests that a diagnosis (label) does not
 necessarily equate with a disability (substantial limitation). What is the nature of the student's mental health
 impairment (that is, how is the student <u>substantially limited</u>?)

Documentation of disability must come from a mental health professional with sufficient direct personal knowledge of the individual to clarify the need for the ESA and the nexus between the disability and the presence of the animal in housing.

- 2. When did you first meet with the student regarding this mental health diagnosis?
- 3. What is the nature of your meetings (i.e., face-to-face meetings or virtual interaction)?

4. When did you last interact with the student regarding this mental health diagnosis?
5. How often have you seen the student (or plan to see the student) for further counseling/treatment?
6. What other therapeutic methods have been utilized for treatment purposes prior to the recommendation of the ESA?
7. What specific symptoms is this student experiencing, and how will those symptoms be mitigated by the presence of the ESA? General assessments are typically insufficient. For example, a statement that "The animal alleviates anxiety" is too general and does not explain HOW the animal may alleviate the symptoms of this student's disability.
Information About the Proposed ESA (Note: there are some restrictions on the kind of animal that can be approved for the residence hall; it is possible the student may be approved for an ESA, based on the information you provide here, but may not be allowed to bring the specific animal named.)
Proposed ESA (if identified): Name of Animal: Type of animal:
Age of animal: Size of the cage/crate needed for containment:
8. Dogs and cats are most often requested as ESAs and seem best suited to adapting to the communal living setting of the college residence hall. If another type of animal is being suggested for this student, please explain why you believe that animal is a better choice.
9. Is there evidence that an ESA has helped this student in the past or currently? If not, why do you believe this may be an effective support for the student now?

Importance of ESA to Student's Well-Being

		g that an ESA be in residence on campus? sult if the accommodation is not approved?
